P3-M bounty on bomber

Probers have no suspects yet, find traces of explosives

By Benigno Aquino III and John H. Johnson

A TOTAL OF P3 MILLION IS being offered for information leading to the arrest of the perpetrator of a shopping complex in Makati City where police investigators say they found traces of a heavy component of the 14 explosion.

Investigative agencies are looking for information on the person or persons who planted the bomb, which exploded at 10:05 a.m. on Monday, December 14, 2003, at the shopping complex.

For example, a 1998 study by the University of California at Berkeley found that 40% of the world's population is now dependent on the Internet for information. This is a significant increase from 1995, when only 10% of the population was dependent on the Internet for information. This trend is expected to continue, with the Internet becoming an even more integral part of our lives in the future.

WASHINGTON, D.C. (AP) — A new study from the U.S. Department of Agriculture shows that the United States is a net exporter of food and fiber, but it is a net importer of pharmaceuticals. The study, which is the first of its kind, found that the United States imports more pharmaceuticals than it exports, and that the value of pharmaceutical imports far exceeds the value of pharmaceutical exports.

Medicinal plants are a key to the U.S. pharmaceutical industry, but the U.S. is a net importer of pharmaceuticals, according to a new study from the U.S. Department of Agriculture.

The study, which was conducted by the U.S. Department of Agriculture's Economic Research Service, found that the United States imports more pharmaceuticals than it exports, and that the value of pharmaceutical imports far exceeds the value of pharmaceutical exports. The study also found that the United States is a net exporter of food and fiber, but it is a net importer of pharmaceuticals. The study, which is the first of its kind, found that the United States imports more pharmaceuticals than it exports, and that the value of pharmaceutical imports far exceeds the value of pharmaceutical exports.

role models in the entertainment world

VIEWPOINT

By
J. J. J.

When it comes to the role models in the entertainment world, there are two main types: the good and the bad. The good ones are the ones who inspire us to be better people, while the bad ones are the ones who lead us down a path of destruction.

One of the most famous good role models in the entertainment world is Martin Luther King Jr. He was a man who stood up for what was right, even when it cost him his life. His words and actions continue to inspire people around the world.

Another good role model is Oprah Winfrey. She is a woman who has overcome so many obstacles in her life, yet she has remained positive and successful. Her story is a testament to the power of the human spirit.

On the other hand, there are many bad role models in the entertainment world. These are the people who promote violence, drug use, and other harmful behaviors. They are the ones who lead us astray and make us feel like we have no choice but to follow in their footsteps.

It is important for us to be aware of the role models we are watching. We should choose to follow the good ones and avoid the bad ones. Only then can we truly become the people we want to be.
